## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 10-12 are allowed in view of the Applicant's arguments (See Response dated 7/8/2005, pg 9, last paragraph, pg 10, paragraph 3) and the cited prior art of record. The independent claims recite a method for enabling a collision-free protocol over a collision LAN in which a logical token ring is formed, where a station requesting to join issues a ring insert request, and waits a time period for acceptance or denial, if denied, requests again, and if the time period has elapsed without a response, the station assuming it is the first to connect or form a ring, issuing a denial message and self-electing itself to play the role of a ring manager, which, in addition to the rest of the claim limitations, are distinguished from the prior art. See supporting sections of the Instant Specification (See Spec, page 10, lines 1-30, page 11, lines 1-15, page 12, lines 12-28).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
